EXPLORING RENEWABLE ENERGY OPPORTUNITIES

- TOGHETER -

What climate measures in your neighborhood can you name that are larger than measures for an individual home?

What climate measures in your neighborhood can you name that are larger than measures for an individual home?

2

Is there interest in collective energy initiatives
for the neighborhood?

What do you see as a solution for collective energy production?

3

What do you see as a solution for collective energy production?

How can we encourage people to get involved in these collective initiatives and investments?

How can we encourage people to get involved in these collective initiatives and investments?

5

Apply **the GIS Tool** and discuss the results.
What are your initial findings?
What new insights do you gain from this?
Where do you see opportunities for collaboration around energy?

Now that you have new insights:
Which topics will we as a group dive deeper into?

6

EXPLORING RENEWABLE ENERGY OPPORTUNITIES

Which organizations (in the neighborhood) are already working on energy measures?

Which organizations (in the neighborhood) are already working on energy measures?

How can we enrich our knowledge about energy?

How can we enrich our knowledge about energy?

Who can enrich this group and why?
(People and organizations)
